

Syllabus reading packet

2 selected courses · Saved 2026-10-08T16:40:26+00:00

Configured Canvas base URL: <https://campus.example.test>

What this packet contains

These are sequential course reads, not a simultaneous snapshot or a promise that policies are current. Read the supplied text, headings, lists and tables below. Source styling and interactive behavior are not retained; malformed or unsupported HTML can look different. An omitted-resource marker is not the resource itself.

Images, media, frames and linked files are not downloaded or embedded. Their supplied descriptions and destinations are shown where available. Follow an online link to read information that exists only there; Canvas may require sign-in. Canvas's separately generated course-summary assignments and events are not included in syllabus_body.

Course identity matches the requested ID. The configured URL supplies link context, not a verified response origin: the unchanged client can use a broker or redirects. Returned names may be your Canvas nicknames.

Open or print this file without CanvasPilot or a network connection. Source previews and text-download controls remain on screen and are left out of print.

Reasoning with Δ and μm

Course ID	41002
Returned name	Reasoning with Δ and μm
Course code	RWM-202
Configured course link	https://campus.example.test/courses/41002/assignments/syllabus

Syllabus HTML supplied. The reading projection follows.

Learning aims

Keep the distinction between a claim and its evidence.

Unicode examples: Δx , μm , ², café, 中文.

| A question can remain open while its evidence improves.

Small practice

```
if a < b:  
    explain("a & b")
```

Second paragraph after a line break.

Keep this visible line.

Notebook

Your own written examples.

Discussion

A comparison of explanations.

Lab Studio <North> & "Field"

Course ID	41001
Returned name	Lab Studio <North> & "Field"
Course code	STU-101 / μ
Configured course link	https://campus.example.test/courses/41001/assignments/syllabus

Syllabus HTML supplied. The reading projection follows.

Studio schedule

Meet on Tuesday & Thursday. Bring a notebook; a < b is example text.

Before each session

1. Read the field note.
2. Write one question.

Materials

- Notebook & pencil
- A ruler marked in cm and mm

Assessment plan

Work	Weight	Window
Participation	20%	Weeks 1–6
Field notebook	30%	Week 5
Review	50%	Week 6

Field-note page [Link target: /courses/41001/pages/field-notes; resolved against configured Canvas URL: <https://campus.example.test/courses/41001/pages/field-notes>; linked content is not included] and External reading [Link target: <https://reference.example.test/reading?chapter=2&lang=en>; linked content is not included] need a network connection if opened.
