

Synthetic Linear Algebra

Report created 2026-10-08T17:16:52Z

This saved observation shows Canvas-reported values for the authenticated caller. It does not refresh or calculate a replacement grade. Counts cover returned rows; whole-course completeness remains unknown.

Values use JSON notation: null means unavailable, false differs from a missing flag, 0 stays zero, and "" is an explicitly returned empty string. A field marked Not returned is unknown.

Reported course totals

Each enrollment stays separate. Current, final and grading-period values retain their original Canvas field names; no enrollment is chosen for you.

Returned enrollment 1

Type (type)	"student"
Role (role)	"StudentEnrollment"
User id (user_id)	7
Enrollment state (enrollment_state)	"active"
Totals for all grading periods option (totals_for_all_grading_periods_option)	false
Current grading period id (current_grading_period_id)	5
Current grading period title (current_grading_period_title)	"Autumn"

Reported totals

Reported current score (computed_current_score)	0
Reported final score (computed_final_score)	0

Reported current grade (computed_current_grade)	null
Reported final grade (computed_final_grade)	null
Current period: reported current score (current_period_computed_current_score)	12.5
Current period: reported final score (current_period_computed_final_score)	null

Assignment groups

- [Exams](#)

Problem sets

Id (id)	3
Name (name)	"Problem sets"
Position (position)	1
Reported group weight (group_weight)	40
Rules (rules)	{ "drop_lowest": 1, "drop_highest": 0, "never_drop": [102] }
Assignments state (assignments_state)	"returned"

Group weights and drop rules are reported context. This file does not select dropped work or recalculate a grade.

Vector spaces

Due date as returned null	Assignment points possible 20
Reported submission score 0	Reported submission grade "0"

Only the grade fields returned by Canvas are shown.

Submission context

Attempt	1
Workflow state	"graded"
Excused	false
Missing	false
Late	true
