

Vector revisions · λ & <proof>

Requested course 71 · Assignment 902

Report created 2026-10-08T17:59:15Z

This is a fixed copy of the self-submission report returned by CanvasPilot. Current data, historical records and top-level comments remain separate. Returned history is not a complete attempt ledger, and no missing version or grade is reconstructed. Creation time is not a Canvas observation or submission time.

In this report

- 1. [Current submission](#)
- 2. [Returned history](#)
- 3. [Returned record 1](#)
- 4. [Returned record 2](#)
- 5. [Returned record 3](#)
- 6. [Returned record 4](#)

Assignment metadata

These fields are retained as returned, including the reported Canvas link when available. Requested selectors above remain separate from returned identity fields.

"id"	902
"course_id"	71
"name"	"Vector revisions · λ & <proof>"
"html_url"	"https://canvas-fixture.invalid/courses/71/assignments/902"
"due_at"	null
"points_possible"	20

Current submission

Canvas reports that the current grade does not match the latest submission. It may describe an earlier attempt; this report does not choose which one.

"id"	501
------	-----

"assignment_id"	902
"user_id"	19
"attempt"	4
"workflow_state"	"submitted"
"submitted_at"	"2026-10-07T14:00:00Z"
"score"	12
"grade"	"12"
"grade_matches_current_submission"	false
"body"	" Current fourth submission only "
"future_metadata"	{ "original": ["keep Σ & <tag>"], "enabled": false }

History in returned order

Canvas returned 4 history records, retained in response order.

Record numbers below are positions in the returned list. Duplicate or absent attempt values remain as supplied. Fields are never copied from the current submission or another record. Submitted HTML, links, attachments and media are shown as literal source text or metadata; their linked content was not downloaded.

Returned record 1

"attempt"	2
"submission_type"	"online_upload"
"score"	0
"grade"	"0"
"grade_matches_current_submission"	true
"attachments"	[{ "id": 508, "filename": "v2- λ .pdf", "size": 42, "url": "https://files.invalid/v2?opaque=literal&second=2"

	<pre>}]</pre>
"submission_comments"	<pre>[{ "id": 6, "attempt": 2, "comment": "Earlier record only" }]</pre>

Returned record 2

"attempt"	1
"submission_type"	"online_text_entry"
"score"	null
"body"	" λ <theta> “quoted”\r\nsecond line <script>alert('never')</script>"
"late"	false
"missing"	null

Returned record 3

"attempt"	2
"submission_type"	"online_url"
"url"	"javascript:alert('literal URL metadata')"
"graded_at"	"2026-10-06T13:00:00Z"
"vendor"	<pre>{ "revision": "other", "control": "a\u0000b", "empty": "", "nil": null }</pre>

Returned record 4

An empty object was returned.

Top-level submission comments

These comments are not assigned to historical records by this report. Their own author, attempt, time and content fields remain as returned. Comments nested inside a record remain on that original record.

Canvas returned 2 top-level comments, retained in response order.

Top-level comment 1

"id"	8
"author_id"	19
"author_name"	"Student λ"
"attempt"	4
"comment"	"Top-level fourth comment literal\nnot assigned to history"

Top-level comment 2

"id"	9
"author_id"	81
"author_name"	"Reader"
"comment"	null
"media_comment"	{ "media_type": "audio", "url": "https://media.invalid/never-fetch" }

Complete report data

Values use JSON notation so an absent field, null, false, zero, empty text and an empty collection keep different meanings. Every original field remains on its record. The download contains the complete normalized reader result, not the raw HTTP pages, attached files or a restorable Canvas backup.

Open this file directly in a browser, or use the browser's Print command. It contains the returned submission content and comments and does not refresh. No submission, grade, comment or read state was changed by this export.
